Linux

PRINTER

Integrated

KEYBOARD

Touch screen and integration in the Security Module

SECURITY MODULE

Glantt Titan

CERTIFICATION

SIBS for purchase and purchase with authorization

ACCEPTED CARDS

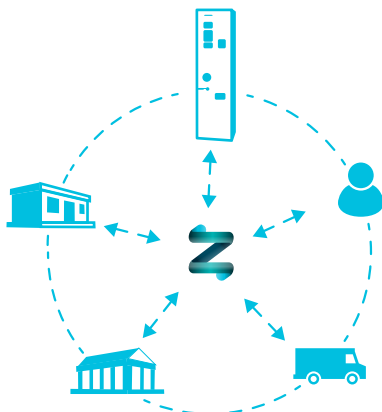

Debit
Credit
Fidelity

Solution

Payment Kiosk is a general-purpose solution able to accept any payment requested by a management application external or internal to the equipment. It provides the necessary payment means, such as bill validator, coin and automatic payment modules, through which the payment functions are provided and controlled. The equipment may have a specific product sales or services application, and therefore autonomous, or be "slave" of an external application in which case a provider of payment services and security of the external application process somehow access the services provided by the equipment.

WEB PLATFORM

This solution is part of a web platform that enables all stakeholders to access information in real time, ensuring process efficiency and maximizing the profitability of the equipment. Gives you the information of the cash deposited in the bank and the fees charged by the bank per each bank card usage.

WEB PLATFORM FEATURES

- > "Online" Information
 - > Payment for equipment
 - > Payment by location
 - > Payments analysis according to predefined criteria
 - > Volume Payments
 - > Management information (period close)
 - > The supported network operating state
 - > Network Monitoring
 - > Reception and Event Review
- > Security
- > Total availability: 24 x 7
- > Alerts via Email/SMS
- > Maintenance
 - > Alerts
 - > Assistance requests
 - > Management Teams control
 - > Remote maintenance
