

# TD 401

## Deposit Solution

### Banknotes and coins

For companies that value cash management and control in real time.

## BUSINESS AREA

TD401 is a coin and banknote Deposit Equipment for small businesses. It is suitable for small-sized retail (e.g., local retail) and any other business where the cashiers are autonomous and need to be accountable at the end of the day.

## BENEFITS

### EFFICIENCY

Greater automation of administrative and control tasks, resulting in overall cost reduction.

### FLEXIBILITY

A solution that adapts to the Client needs and is easily integrated into an enterprise management system.

### SECURITY

Based on the latest technology, this solution allows the detection of suspicious coins and notes and significantly reduces the risk of internal theft and robbery.

Accepts Coins  
and Banknotes

Alarm System

Up to 2000 Coins  
and 2200 Banknotes

Integrated  
with ZGS

Email / SMS

### PRINTER

Network or Dedicated

### KEYBOARD

4 x 3

### IDENTIFICATION

RFID

**Note:** The equipment can be plumbed to the ground, may have vandal proof sensors and send alarms whenever a anomaly is detected.

## ZGS | WEB PLATFORM

Our deposit solution offers all stakeholders information management in real time guaranteeing process efficiency and maximizing equipment profitability. From the cashier to the company management the information can be managed in real time according to the internal process. Decisions are based on management information.

### ADAPTABILITY

Adapted to situations where there are several points of sale, with great mobility of human resources and several shifts, allowing a central consolidation of information with an integration in management ERP's.

### GROUP CONCEPT

This solution allows information control and manage in a centralized and hierarchical way. If a company wants to have multiple points of collection, this solution not only allows employee mobility, but also ensures information control and centralization. On the other hand, if various companies want to share a collection point, they may do so in a secure manner; since the solution has the possibility to classify and prioritize information to each one of the companies.
