### SOLUTION

TP412 is a high speed and large capacity cash deposit solution that allows businesses that handles large volumes of cash to deposit banknotes by bulk. It allows companies to manage their cash centrally, with notion of group. It allows a cash collection point to be concentrated several points of sale with differentiation of deposit account or not. This Solution was specially designed for large companies, such as large retail (e.g., Shopping Centers, Super and Hypermarkets); Airports, Train Stations; and any other business where the cashiers are autonomous and need to be accountable at the end of the day.

600 Banknotes per minute

Safe Capacity 35 000 banknotes

Escrow up to 400 banknotes

Integrated with ZGS

## ZGS | WEB PLATFORM

Our deposit solution offers all stakeholders management information in real time guaranteeing process efficiency and maximizing equipment profitability. From the cashier to the company management the information can be managed in real time according to the internal process. Decisions are based on management information.

### ADAPTABILITY

Adapted to situations where there are several points of sale, with great mobility of human resources and several shifts, allowing a central consolidation of information with an integration in management ERP's.

### GROUP CONCEPT

This solution allows information control and manage in a centralized and hierarchical way. If the company wants to have multiple points of collection, this solution not only allows employee mobility, but also ensures information control and centralization. On the other hand, if various companies want to share a collection point, they may do so in a secure manner; since the solution has the possibility to classify and prioritize information to each one of the companies.

### WEB PLATFORM FEATURES
